New KOSMOS is coming in September!

1. First ever in Japan! The cloud-basis library system, co-developed with Waseda University, is coming.

2. Searches scholarly information around the world along with our library collections.

3. Cross-searches the collections of both Keio and Waseda, which consist of more than 10 million items.

System suspensions, service limitations, change of the URL and interface of KOSMOS, and of loan rules will occur due to the system migration.

Notice

For the latest info on the system migration, check our website: https://libguides.lib.keio.ac.jp/notice_en
